

IN Statement
 Allows us to specify specific values in a column
 that we want to include.
 The values not included in will be excluded from the
 final outcome

```
SELECT column 1,  
        Column 2
```

```
FROM database . schema . table
```

```
WHERE column IN (value 1, value 2, value 3);
```

Shoprite . online . sales

Customer id	Customer name	City
111	Rofhi	JHB
112	Mbali	CPT
113	Lerato	JHB
114	Thabo	PTA

```
SELECT customer - name,  
        City
```

```
FROM Shoprite . online . Sales
```

```
WHERE city IN ('JHB', 'PTA')
```

Customer name	City
Rofhi	JHB
Lerato	JHB
Thabo	PTA
