

Delete

Drop and truncate are danger (runaway).

LEFT JOIN

I want every row in the left table (base table)
I want only the rows that match from the other table.

```
SELECT column.  
FROM table1 AS A  
LEFT JOIN table 2 AS B  
ON A.common-column = B common-column;
```

~~Tables~~ Customer

Customer id	Name	order id	customer id	Amount
1	Rofhiwa	101	1	300
2	Mruko	102	2	150
		103	3	500

Question

Write an SQL script to get the customer-id, name, amount

```
SELECT customer id,  
       Name,  
       Amount
```

```
FROM Customers AS A
```

```
LEFT JOIN orders AS B
```

```
ON A.customer id = B.customer id
```

customer	Name	Amount
1	Rofhiwa	300
2	Mruko	150
