

① Categorical data

Store location, Product category, Product Detail
Product Set

② Quantitative Data

Transaction Qty, Unit Price ($\text{Revenue} = \text{Quantity} \times \text{Price}$)

LESSON 21 (Miro)

What is it that we're gonna do with the data that I have?

• Plan the flow chart, the flow of the data.

NOTE We need to understand where the data is coming from and where it is going.

• Building the concept map

• Map out the diagram of the flow of data (where is the data sitting & where should it go and how has been used in each and every step)

~~There is the data source~~

Analysing the process flow on Miro

CANVA.com

It outlines when we're gonna do what

After what we gonna do (Miro) then when we gonna do (canva)
