

* DateDiff (unit, date1, date2)
Used to calculate the difference between two dates
date 2 - date 1 = value

Unit - Day, month, Year

Select DateDiff (Year, '2025-06-01', '2027-06-01')
2

* Current_date () → It gives you today's date based on the DMS settings.

Select Current_Date ();
'2026-04-13'

Current_Timestamp ();

2026-04-13 20:05:54.13

will give you the date and the time

What you need on your readme file:

- ① Problem statement
- ② Aim of the project
- ③ Objective-steps taken to solve for the aim.
- ④ Summary of results
- ⑤ Tools used in the case study.
