 From Sales *
 Join product B on
 ON A.productID = B.productID

The difference between bigint (BIGINT) and int (INT) is that:

- BIGINT ^{used for large scale numbers} can carry large values while INT carries small amount of values.
- Varchar specify the number of characters
- ALTER is used to change the structure of an existing table. Modify an existing table

Add a new column

Remove a column

Change a column's data type

Rename a column.

ALTER TABLE my.coffee.table.dim_customers RENAME
 loyalty_points to points

Before rename

NB//

ALTER TABLE my.coffee.table.dim_customers SET TBLPROPERTIES
 ('delta.columnMapping.mapped'='name')
