

04/05/24 lesson of Augmented with AI

AI tools

- |              |             |                |
|--------------|-------------|----------------|
| - Gemini     | - Kimi      | - Zapier       |
| - ChatGPT    | - base 44   | - Whisper flow |
| - Claude     | - replit    | - SmartCAT     |
| - Meta AI    | - manus     | - Julius ai    |
| - Grok       | - Cones     | - Quillbot     |
| - deepseek   | - lovable   | - Genie AI     |
| - Copilot    | - Vercel    |                |
| - NotebookLM | - Cursor    |                |
| - Gemma      | - Lelapa AI |                |
| - Canva      | - Kiro      |                |
| - Perplexity | - DELL-A    |                |

GPT → Generative Pre-Trained Transformer

LLM - Large Language Model

Machine learning → Enables a machine to learn patterns  
↳ learns patterns from data

Branch of Artificial intelligence (AI) where computers /  
systems learn patterns from data to make predictions

AI - Artificial intelligence:

for an AI system to exist it needs to learn patterns  
from data.

Hallucinating - make things up that are incorrect

RAG - Retrieval Augmented Generation  
vector Database
