

F1 close to 0: Poor model perform
A high F1-score means both precision and recall are high

RAG (Retrieval Augmented Generation)

- It is a method where an AI system first retrieves relevant information and then generate an answer using that information

Hybrid RAG - Answering generally with RAG - checking notes, then answering.

Question 1.

How RAG works

Vector Embedding

Is a numerical representation of data points that represents different data types - including non-mathematical data such as words or images
